DETAILED ACTION

1. As per the most recent interpretation of the 35 U.S.C. 101 Interim Guidelines, the Notice of Allowance mailed 11/4/06 has been withdrawn, and prosecution on the merits is reopened.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1,3-7,9-14,16-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. As per the Interim Guidelines regarding 35 U.S.C. 101, claims 1,3-6,13,14,16-19,21 define non-statutory processes because they merely manipulate an abstract idea (mathematical algorithm) without a claimed limitation to a practical application. If the acts of a claimed process manipulate only numbers, abstract concepts or ideas, or signals representing any of the foregoing, the acts are not being applied to appropriate subject matter (Benson, 409 U.S. at 71-72, 175, USPQ at 676). Furthermore, claims define nonstatutory processes if they simply manipulate abstract ideas (Warmerdam, 33 F.3d at 1360,31 USPQ2d at 1759). Lastly, in evaluating claims in view of 35 U.S.C. 101, the "limited to the technological arts" test is no longer valid (see Annex III of the Interim Guidelines). As per the Interim Guidelines regarding 35 U.S.C. 101, claims 7,9-12, and 20 define a non-statutory process

because these claims are computer program claims (Warmerdam, 33 F.3d at 1361,31 USPQ2d at 1760).

Priority

4. Proper priority and support has been established in the aforementioned 09/615726 (the '726 application) Examiner notes that the 35 US 112 1st rejection has been overcome since the issue of priority and incorporation by reference has been resolved.

Allowable Subject Matter

5. Claims 1,3-7,9-14,16-21 are allowed over the prior art of record.

6. The following is an examiner's statement of reasons of allowable subject matter:

As per the independent claims, the claim recitations pertaining to identifying a maximal element to a concept, and a chain from the maximal element to every concept; and constructing state vectors in the topological vector space for the semantic content using the measures of relationship between lexemes/lexeme phrase in each chain in the dictionary is not explicitly taught by the prior art of record.

A representative prior art, Gillis (6523026), teaches semantic representation (col. 1 lines 10-22; as a semantic representation -- fig. 4) storing the semantic document (col. 40 lines 52-62); constructing term vectors (col. 41 lines 15-25); adding the vectors into one (col. 41 lines 22-

26); and storing the abstract representations (abstract). However, Gillis (6523026), does not explicitly teach the relationship between the semantic content vector space and the lexeme phrases. Furthermore, it would not have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teachings of the prior art of record to obtain the recited limitations of the independent claims as noted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
